

## Mother Sow “Guta”

Feed additive – vitamin–mineral complex for enrichment (balancing) of sow feed.

---

### Composition

Vitamin A, D3, B1, B6, B12, E, K3, D, L-methionine, L-lysine, nicotinic acid, calcium pantothenate, choline chloride, gentian root, carnitine hydrochloride, sodium glutamate, sodium chloride, magnesium carbonate, zinc carbonate, iron sulfate, copper sulfate, potassium iodide, calcium carbonate, dicalcium phosphate, sodium selenite.

---

### Advantages

- The mineral complex, trace elements, and fat-soluble vitamins included in the feed additive ensure the daily nutritional requirements of sows for essential nutrients;
  - Supports normalization of metabolism during unbalanced feeding;
  - Positively affects weight gain and improves resistance to stress.
- 

### Dosage Form

Packed in 250 g sachets.

---

### Directions for Use and Dosage

The feed additive is used to enrich and balance sow feed.

- One sachet is mixed with the main feed at the rate of 250 g of feed additive per 30 kg of feed.

The feed additive is not a complete feed; it is a supplement to the main diet.

---

### Storage Conditions

Store in a dry place protected from light at 15–25°C.

**Shelf life: 1 year.**
