

## **Piglet “Nafia”**

Feed additive – vitamin–mineral complex for enrichment (balancing) of piglet feed.

---

### **Pharmacological Group**

Feed additive

### **Target Species**

Piglets

---

### **Advantages**

- Ensures maximum feed utilization;
  - Reduces the risk of diarrhea associated with transition to solid feed;
  - Supports development of the gastrointestinal system and strengthens the immune system;
  - Contains all essential vitamins, amino acids, macro- and microelements necessary for raising healthy and highly productive piglets.
- 

### **Indications**

- Prevention of vitamin deficiency from the first days of life;
  - Ensuring high productivity;
  - During periods of intensive growth and development;
  - During veterinary procedures (vaccination, drug therapy);
  - Prevention of stress (temperature changes, feed changes, technological stress);
  - Prevention of metabolic disorders caused by hypovitaminosis and unbalanced nutrition;
  - Improvement of skin condition (B-group vitamins contribute to dermatitis prevention).
-

## **Composition**

Vitamin A, Vitamin D3, Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, Vitamin E, Vitamin C, Vitamin K3, Vitamin D, L-methionine, L-lysine, nicotinic acid, calcium pantothenate, choline chloride, gentian root, carnitine hydrochloride, sodium glutamate, sodium chloride, calcium chloride, magnesium carbonate, zinc carbonate, iron sulfate, manganese sulfate, copper sulfate, potassium iodide, zinc sulfate, calcium carbonate, dicalcium phosphate, sodium selenite.

---

## **Dosage Form**

Packed in 250 g sachets.

---

## **Directions for Use**

The feed additive is mixed into piglet feed for enrichment (balancing) at the following dosage:

250 g per 30 kg of feed.

---

## **Storage Conditions**

Store in a dry place protected from light at 15–25°C.

---

## **Manufacturer**
